How to Bill

The Billing Absolutes!

No ifs, ands, or buts…

Rule #1 - No client can be seen until consents are signed

Rule #2 - The assessment is always billed first - nothing else can be billed before it (unless it's an ITXXCC or CCM which are not billable codes)

Rule #3 - You must do a Treatment Plan within 10 business days from the date of the assessment. TPs need to be signed by the caregiver

Rule #4 - You must track when documents expire and cannot see clients until they have been renewed (this goes for consents, assessments, treatment plans, and treatment plan reviews)

Biopsychosocial - PSY
In-Depth Assessment - IDA

ONE PSY per year – H0031 HN

ONE IDA per year – H0031 HO

ONE PSY Annual Update – H0031 HN

ONE IDA Annual Update – H0031 TS

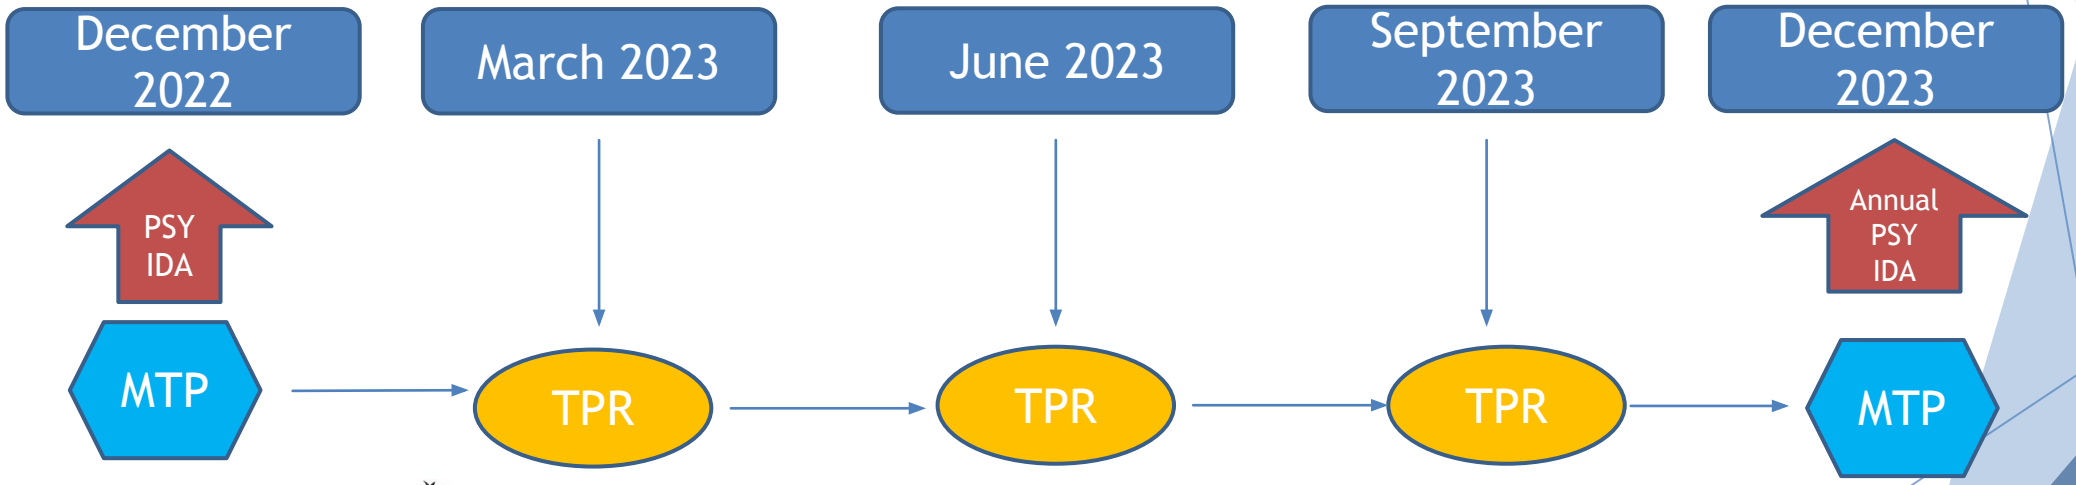
All of them: 1 unit - 1 hour

Treatment Plan and Treatment Plan Reviews

ONE Master Treatment Plan per year – H0032 – 1 unit – 15, 30, 45, 60 min

ONE Treatment Plan Review per quarter – H0032TS – 1 unit – 15, 30, 45, 60 min

For SBMH:
Include teacher goal (SBMH) or parent goal (all others)



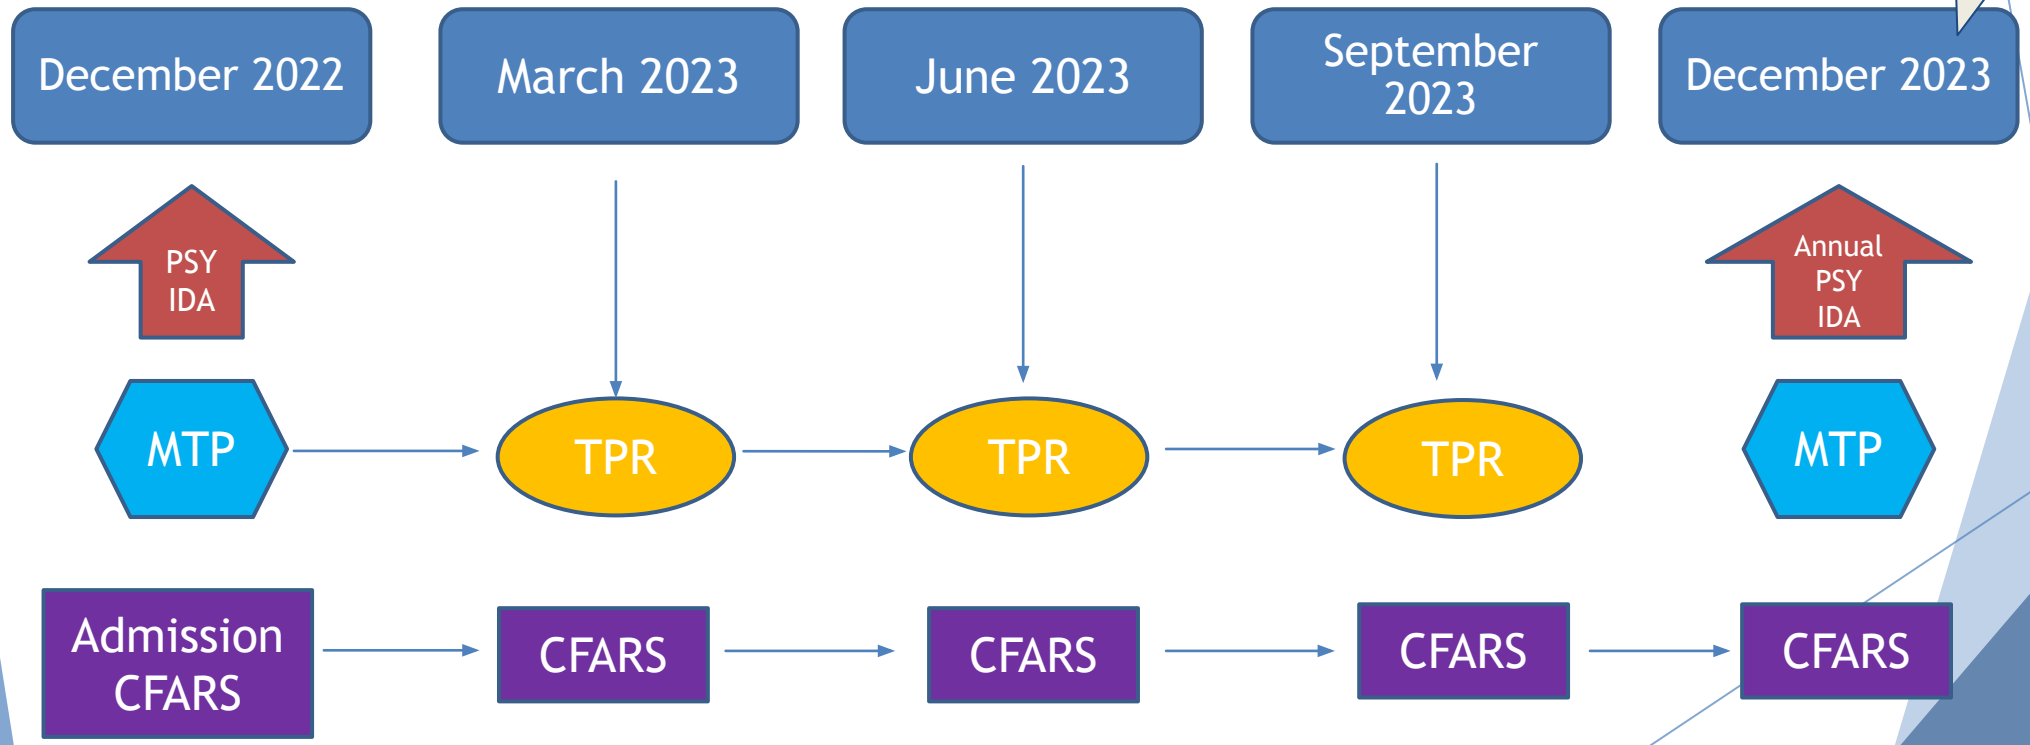
1 additional TPR is allowed throughout the year if needed

CFARS - H0031

6 years-old and above AND Medicaid ONLY

CFARS – 1 unit – 15 minutes
ONE CFARS at Admission – ONE CFARS at Discharge – ONE CFARS per quarter

Bill the first 3 CFARS to H0031
Bill 4th CFARS to CCM



Brief Behavioral Status Exam - BBSE

Licensed clinicians will be able to document a Brief Behavioral Status Examination – BBSE – H2010 HO if a call is received to assist in the crisis intervention/ BTA/ SRA of an existing client.

A Mental Status Examination is an assessment of mental capacity through evaluation of general appearance, behaviors, perceptions, mood and all aspects of cognition such as attention, orientation, memory, etc.

Code H2010 HO
Can bill 15 or 30 minutes (1 or 2 units)
Maximum 2 units per day
Up to 10 units per year
Cannot be billed on the same day as a PSY or IDA

Individual/Family Sessions - H2019 HR

Sessions can be billed as:

Individual session: If the therapist worked alone with the client

Family session with client present: If the therapist worked with the client and one or more family members.

Family session without client present: If the therapist worked with one or more family members and the client was not present (the session has to be pertinent to the client's therapeutic work)

Cannot bill two H2019HR codes in one day, no matter the length of time, and no matter if one is w/the child and the other is w/the parent. Two in one day is not allowed.

Sessions can last:
1 unit - 15 mins.
2 units - 30 mins.
3 units - 45 mins.
4 units - 60 mins.
Medicaid allows 7 mins. for documentation, add this time to your session and round up to the next unit.

For the clients with Sunshine Health - ONLY

CODE: T1023 HA

Children 0-5

Used when billing: Tests, inventories, questionnaires, structured interviews, structured observations, and systematic assessments that are administered to help assess the caregiver-child relationship and to help aid in the development of the treatment plan.

How many?: 40 units or 10 hours per calendar year

Writing the note: "Therapist completed _____ a standardized systematic assessment to assess the caregiver-child relationship and gather information for treatment plan development. The caregiver shared risk factors associated with child-rearing and symptoms that warrant further assessment."

For the clients with Sunshine Health - ONLY

CODE: T1027

0-21 years old with a Serious Emotional Disturbance (SED) diagnosis whose caregivers could benefit from assistance.

Services to help caregiver(s) understand and manage a member's behavioral needs related to a Serious Emotional Disturbance (SED) diagnosis to promote the client's development. Client is not required to be present, but may be if appropriate.

Services include: support groups or individual sessions for family members; psychosocial activities; and other education and support activities related to SED in children.

How many?: Maximum of 36 units or 9 hours per month.

Writing the Note: "Therapist offered family psychosocial education to help caregiver understand and manage child's behavioral needs related to child's _____(diagnosis)."

Early Childhood Court - ONLY
Sunshine Health & CPP - ONLY
Client age 0-3 - ONLY

CODE: H2014

0-3 years old only, must have Sunshine, must be in ECC

Bill this code for:

- ***CPP sessions***
- ***Time in court***
- ***Time in family team meetings***

No limit to how much, can be billed

This is a pilot that started on June1, 2025.

What will change regarding our current sessions vs. consultations?

Individual Sessions

- Scheduled weekly sessions
- Scheduled Intensive services - sessions twice a week.
- Scheduled weekly sessions plus additional sessions as needed.

Where do I schedule this?

In the Master Treatment Plan or Treatment Plan Review, the clinician decides and modifies the frequency of services as needed throughout the year, that's why we have UP TO 4 TPR's.

Crisis Intervention

If the clinician participates in a support call for a client, and during the intervention, the clinician has to:

Spend time with the client, alone or not.

Provide stabilization, practice coping skills, process distorted thoughts and feelings, any type of therapeutic intervention.

The clinician should bill a session – H2019 HR – document what was the reason, who was present and the length of the intervention in units. Licensed clinicians can also bill a BBSE-H2010 HO for 15 or 30 minutes

Family Sessions

Clinicians should try to reduce frequent phone exchanges with parents and caregivers, and increase scheduled in-person or zoom time with them, as regular outpatient services.

The purpose of this scheduled time is:

Improve relationships.

Exchange therapeutic tools.

Benefit the family system

These will be billed as Family Sessions with/without Client Present – H2019 HR, for the length of the session in units.

What can I bill in my first encounter with a parent/caregiver?

On the day of the PSY, a clinician can bill:

ONE PSY or IDA – H0031 HN – 1 unit

ONE TP – H0032 – 1 unit

ONE CFARS – H0031 – 1 unit

Note: CFARS can only be billed if the client has Medicaid

CFARS can ONLY be assessed if the client is present

Ask your Supervisor about how to optimize this time!

Groups – H2019 HQ

For each participant, the clinician will have to complete:

1. Intake
2. PSY or IDA – H0031 HN
3. TP – H0032
4. CFARS – H0031 (Only Medicaid or FKC clients)
5. Bill group sessions – H2019 HQ

Please consult with your Supervisor if you are planning on facilitating or co-facilitating any type of groups.

Note: Group and Individual cannot occur on the same day.

Clinical Consultation (ITXXCC) and Clinical Case Management (CCM)

Depending on funding, some therapists will have additional service codes:

ITXXCC (Clinical Consultation) - Use this when talking to someone via telephone; or when talking to other support people (ie: consulting with the child's speech therapist or the counselor at the child's school).

CCM (Clinical Case Management) - Use this when writing reports outside of your normal documentation (ie: special reports for court, etc)

These codes can be used to document the therapist's time doing activities that cannot be billed to insurance such as phone calls and writing reports for special circumstances (court reports).

Remember, you want to limit the amount of time you are talking to people outside of sessions. You can politely say, "That sounds important. Let's set up time to talk." As long as this time is in person or on Zoom - It's a billable session. If you end up talking by phone, then it's an ITXXCC.
